

As a follow up to the **Third International Verification Workshop**, held in 2007 in Reading, UK, a collection of leading papers has been published in a special issue of [*Meteorological Applications*](#).

The aim of this is to bring verification methodologies and their applications, both in research and operational activities, to the attention of a wider community, and provide the reader with background information on the state of the art in verification methods, newly developed techniques and current challenges, such as accounting for insufficient observations, appropriateness of scores and confidence estimation.

Forecast Verification

(Volume 15, Issue 1)

Issue Edited by Anna Ghelli, Elizabeth Ebert

Featuring in this special issue:

Editorial

[Special issue on forecast verification](#)

Anna Ghelli, Elizabeth Ebert

Review

[Forecast verification: current status and future directions](#)

B. Casati, L. J. Wilson, D. B. Stephenson, P. Nurmi, A. Ghelli, M. Pocerlich, U. Damrath, E. E. Ebert, B. G. Brown, S. Mason

Research Articles

[On the effect of ensemble size on the discrete and continuous ranked probability scores](#)

Christopher A. T. Ferro, David S. Richardson, Andreas P. Weigel

[The impenetrable hedge: a note on propriety, equitability and consistency](#)

Ian T. Jolliffe

[Understanding forecast verification statistics](#)

S. J. Mason

[The extreme dependency score: a non-vanishing measure for forecasts of rare events](#)

D. B. Stephenson, B. Casati, C. A. T. Ferro, C. A. Wilson

[Fuzzy verification of high-resolution gridded forecasts: a review and proposed framework](#)

Elizabeth E. Ebert

[The accuracy of weather forecasts for Melbourne, Australia](#)

Harvey Stern

[Seasonal forecasting of Ethiopian spring rains](#)

G. T. Diro, E. Black, D. I. F. Grimes

[Searching for systematic location errors of quantitative precipitation forecasts over the Calabria region](#)

Nazario Tartaglione, Stefano Mariani, Marco Casaioli, Christophe Accadia, Stefano Federico, Silas Chr. Michaelides

[Doppler radar radial wind data in NWP model validation](#)

Kirsti Salonen, Heikki Järvinen, Simo Järvenoja, Sami Niemelä, Reima Eresmaa

[Valuing information from mesoscale forecasts](#)

Kees Kok, Ben Wichers Schreur, Daan Voegelejang

[Terminal aerodrome forecast verification in Austro Control using time windows and ranges of forecast conditions](#)

Guenter Mahringer

[A spatial verification method applied to the evaluation of high-resolution ensemble forecasts](#)

Chiara Marsigli, Andrea Montani, Tiziana Paccagnella

[On the use of the intensity-scale verification technique to assess operational precipitation forecasts](#)

Gabriella Csima, Anna Ghelli

[How much does simplification of probability forecasts reduce forecast quality?](#)

F. J. Doblas-Reyes, C. A. S. Coelho, D. B. Stephenson

[Assessing the spatial and temporal variation in the skill of precipitation forecasts from an NWP model](#)

Nigel Roberts

[**A multi-model/multi-analysis limited area ensemble: calibration issues**](#)

Marino Marrocu, Piero A. Chessa

[**Evaluating forecasts of extreme events for hydrological applications: an approach for screening unfamiliar performance measures**](#)

Hannah L. Cloke, Florian Pappenberger

[**Accounting for the effect of observation errors on verification of MOGREPS**](#)

Neill E. Bowler

Don't miss out on the latest research

Why not set up **Free RSS Feeds** straight to your desktop so that you receive the most recent *Meteorological Applications* articles published on EarlyView? Simply click on the RSS icon  on the journal homepage.

Register for **Free Content Alerts** and receive the Table of Contents for the latest issue as soon as it is published online. Just click "**Set E-Mail Alert**" on the journal homepage.

Backfiles now available

In addition to the wealth of current content available, [*Meteorological Applications backfiles*](#) are now available providing access to full web content from 1994 onwards.

These backfiles are part of the Wiley InterScience Earth and Environmental Sciences Backfiles Collection, which is comprised of the most prestigious journals in the discipline and addresses the major research topics in the field including: meteorology, geology, geoarchaeology, and quaternary science.

Why not recommend these to your librarian today? Just click "**Recommend to Your Librarian**" on the journal homepage.

Benefits for Royal Meteorological Society members

Did you know that as a member of the **Royal Meteorological Society** you automatically receive full-text access to **Royal Meteorological Society** journals?

These journals include:

[*Atmospheric Science Letters*](#)

[*International Journal of Climatology*](#)

[*Meteorological Applications*](#)

[*The Quarterly Journal of the Royal Meteorological Society*](#)

[*Weather*](#)

[Click here](#) to access content from these journals today.

All those attending EGU

Wiley-Blackwell will be at EGU 2008, 13-18 April. Visit us at ***booths 43-45*** for more earth and environmental sciences books and journals than ever before, and discover our comprehensive collection of research materials.

Find out more about *Meteorological Applications* today by visiting:
