2 Feb 2007
In going from Perfect to Imperfect Model:

60% prob(X) unchanged
20% prob(X) increased
20% prob(X) decreased.

Where prob(X) := bet on the verification.

Considering all the bets:
For each individual pin: ~60% of you changed a bet, 40% kept the same
But counting all pins: ~30% people held all bets constant!

Circling the Right Target:

You did systematically better on the Red Reality ball than on the Golf ball.

Number Correct       Golf-ball   Red-Ball
0                     76         43
1                     17         38
2                     2          10
3                     1          5

So the betting strategy mattered!
These were the bins you circled for the golf ball

Initial Condition

White

Red

Yellow
These were the bins you circled for the red reality
Max Single Bet

Initial Condition

White

Red

Yellow
Details:

Those who bet less than 100 were allowed to keep the remainder as winnings!
Those who bet more than 100 were renormalized.

Results:

Honourable Mention (over all or in each event):

Ferro, “ND2”, SJM, Louro Kalin, Mirta Pataroic and C. Santos

And the winner is:

CBELL
