

Subject: Kronos 0.5.0 release

Dear Colleague,

Kronos version 0.5.0 has just been made available on the benchmarks FTP-site <ftp.ecmwf.int> and can be downloaded using the credentials already provided by ECMWF.

After accessing the FTP-site, please download the 2 files below from "/ecbench/kronos/0.5.0":

- Kronos_README.pdf

- kronos-installer-0.5.0.tgz

Kronos 0.5.0 will be used together with RAPS and PGEN applications to run the ITT benchmarks. Nevertheless, specific instructions for how to run the benchmarks will be provided separately and upon release of the ITT.

Should you have any questions, please email them to ecbench@lists.ecmwf.int.

Best Regards,

Antonino, Tiago
