| SECTION 1: HOME             | PAGE   |                          |
|-----------------------------|--|--------------------------|
| Screenshot                  | Journey  | Remarks                  |
| Processor                   | Step 1: Log in as ecmwf_admin  | Should take less that 5s |
| erresse.                    | Step 2: Expand each category from the cards.   |                          |
| E.g. suggestion to Cristian | → confirm that these load correctly (the organisation with the pending publication is shown first then the other organisations are in alphabetical order). |                          |
|                             | Step 3:  |                          |
|                             | 3a) Search for 'Italy' in the search box.  |                          |
|                             | 3b) Search for 'Italy' in the search box ticking the Country filter.   |                          |
|                             | 3c) Search for   |                          |
|                             | ENE  |                          |
|                             | In the search box.   |                          |
|                             | 3d) Search for ENE in the search box ticking the Destination filter.   |                          |
| No. 2 2 2 2 1               | Step 4: From the previous search, click on the organisation Enercast.  |                          |
| Transi (1946)               | Step 5: Open and close the ENE destination card from the page AND from the side menu.  |                          |
| SECTION 2: FEED             | PAGE   |                          |
|                             | Step 6: Click on ENE feed D1.  |                          |
|                             | $\rightarrow$ Confirm that the CODE and DRAFT tabs contain the same requirements by using the diff.  |                          |
| Step 10:                    | Step 7: Edit draft and 'make operational'  |                          |
| Step 10:                    | Step 8: On the same feed, ENE:D1 change the feed status (I can do this from the CODE tab or the DRAFT tab).  |                          |
|                             | ightarrow Confirm that the confirmation pop up is working.   |                          |
|                             | Step 9: Confirm the publication  |                          |

|                                      | in   |                |
|--------------------------------------|--|----------------|
|                                      |  |                |
|                                      | Step 10: Go to the old versions tab  |                |
| SECTION 3: I                         | MY DRAFTS  |                |
|                                      | Step 11: Go to 'My drafts'   | Should be fast |
|                                      | Step 12: Click on any of the free drafts and type 'Accuweather' in the search bar.   |                |
| E                                    | Step 13: Choose to publish the free draft on ACU:A1  |                |
| -                                    | → A confirmation pop up occurs.  |                |
|                                      | Step 14: Confirm the publication.  |                |
|                                      | → This takes you to ACU:A1 feed page.  |                |
|                                      | Step 15: Go to the old versions tab of ACU:A1 and view a diff between the operational version and the latest old version.  |                |
| SECTION 4: I                         | PUBLICATION REQUESTS   |                |
|                                      | Step 16: From the 'publication requests' page, click on one of the requests that has come from a free draft.   | Should be fast |

| anday -                                  | Step 8: From the 'EDIT DRAFT' tab, 'Select feed option' becomes editable  |   |

## **ECMWF Admin** Step 9: The drop down highlights the two options Step 10: A confirmation popup prompts the user for confirmation Step 11: The publication request loads on the feed page. Step 12: On another browser, log in as ecmwfadmin Step 13: $\rightarrow$ confirm that the publication request appears in the 'publication requests' counter and page Step 14: → confirm that the publication request shows on the ECMWF admin homepage under the organisation and destination cards STEP 15: TEST SIMULATENOUS ACTION: Step 15a: First, maxchen cancels the publication request, then, at the same time from a different browser, ecmwf-admin accepts the publication request. → Confirm that the ECMWF admin has confirmation that the action is performed. Maxchen see's that the publication cannot be cancelled because it has already been processed. Step 15b: First, accept the publication request as ecmwf-admin. Then, at the same time from the other browser, as maxchen, 'Cancel' the publication request. → Confirm that this change is logged in the 'old versions tab' → Confirm that the side menu and destination card show the feed option change Step 16: Go to the 'Old versions' tab and see the latest change logged, with a description and timestamp. Step 17: View a diff between this version and any other version. I can 'save draft' or 'save free draft' of any of these versions. Step 18: As maxchen, go back to ENE:D1.

| ECMWF Admin         |  |  |
|---------------------|--|--|
|                     | From the 'EDIT DRAFT' tab all buttons become active                                      |  |
|                     | Step 19:   |  |
|                     | a) Make some modifications, b) Add a description of changes                              |  |
|                     | c) 'Request publication'   |  |
|                     | → A confirmation pop up appears.   |  |
|                     | d) Add a publication note.   |  |
|                     | → Tooltips are working.  |  |
|                     | Repeat steps 12, 13 and 14 as ecmwf-admin.   |  |
|                     | Step 20: ecmwf-admin 'Cancel' the publication request.                                   |  |
|                     | ightarrow the draft is saved in the draft tab.   |  |
|                     | Repeat step 19 as maxchen.   |  |
|                     | Repeat steps 12, 13 and 14 as ecmwf-admin.   |  |
|                     | $\rightarrow$ confirm that the ECMWF admin can see the description AND publication note. |  |
|                     | Step 21:   |  |
|                     | 'Confirm and make operational' as an ecmwfadmin.   |  |
| heb                 | Step 22:   |  |
|                     | As ecmwf-admin and/or maxchen, go to the 'Old versions' tab to see the latest changes.   |  |
|                     | $\rightarrow$ see the description that I added to this version.                          |  |
|                     | → Check that all tooltips are working  |  |
|                     | Step 23: As maxchen, 'save as free draft'  |  |
| bodd bibe           |  |  |
| Jedustini (MI)      |  |  |
| Request publisation | Step 24: request publication of the free draft on ENE:E1                                 |  |
|                     | → confirm that confirmation pop up is working.   |  |
|                     | Repeat steps 12, 13 and 14 as ecmwf-admin in another browser.                            |  |
|                     | Step 25: As ecmwf-admin, 'Deny' publication request                                      |  |
|                     |  |  |

| ECMWF Admin               |   |  |
|---------------------------|---|--|
|                           | → Confirm that this does not delete the free draft, it only cancels the publication request.  |  |
|                           | As maxchen, repeat step 25  |  |
|                           | Step 26: As ecmwf-admin, confirm the publication on ENE:E1  |  |
|                           | $\rightarrow$ this updates E1 and takes you to the E1 feed page.  |  |
|                           | Step 27: As maxchen, edit the draft of the ENE:D1 and 'save as free draft'  |  |
| Fire Birl's Everyor Chiba | Step 28: Go to 'Free drafts' page   |  |
|                           | Step 29: Load the most recent free draft and<br>'request new feed'  |  |
|                           | Repeat steps 12, 13 and 14 as ecmwf-admin in another browser. This should only show the publication request on the 'Publication requests' page, not on the organisation card because this is requesting a NEW feed. |  |
