

Subject: IFS benchmark RAPS18 update 2.1

Dear Colleague,

We would like to announce the release of a bugfix to the IFS benchmark RAPS18 update 2.

The source code tarball, (RAPS18u2.1.tgz) and documentation (raps18u2.1.pdf), can be downloaded from the ECMWF ftp site (ecbench@ftp.ecmwf.int, /ecbench/raps18).

Please note that your company needs a licence to get the password for this FTP-site. If such a licence already exists, you can request the ftp-password by sending an email to ecbench@lists.ecmwf.int

Requests for a licence for our benchmarks and any general queries should be sent to sec270@ecmwf.int

Technical questions on the benchmarks can be sent to ecbench@lists.ecmwf.int

After the release of the ITT all emails to ecbench@lists.ecmwf.int need to be sent to the email-address bench270@ecmwf.int instead.

with best regards,

Sami Saarinen
Iain Miller
